Reflection

"Perseverance is not a long race, it is many short races one after another".

[Charles W. Elliot]

Happened

Speech at Copel

Attending the invitation from Companhia Paranaense de Energia, Edison Fontes, partner at Nucleo, conducted a lecture about Information Security (IS) to company employees in Curitiba, on May 3. Fontes started his speech reminding that IS is not for free and its management is the basis for knowledge management in the organization. He explained to participants how the information protection process inside the company should be based on ISO 27002, an information security standard that provides the best practice recommendation to initiate, implement, maintain and improve Information Security management in an organization. "Information Security is a process which aims to enable the company to achieve its goals related to information and information resources" (...) "Security exists to attend business", explained Fontes.

Workshop FGV Projetos

In order to present an innovative solution to prevent fraud in the corporate environment, FGV Projetos held on May 15 the Workshop Advanced Vision of Corporate Fraud Prevention: practical and advanced processes to prevent loss related to deviations, lack of control and fraud. The meeting, which brought together FGV experts and businessmen from all over the country, was focused in presenting a new methodology for fraud problems and corporate fraud solutions aiming to meet the market demand when adopting the best business management practices. "I thank FGV for the invite and congratulate the project coordinators for the great work; they demonstrated how the union of processes, controls and programs can make possible a organizational culture change", said Igor Pipolo, who attended the event.

Cobrase 2012

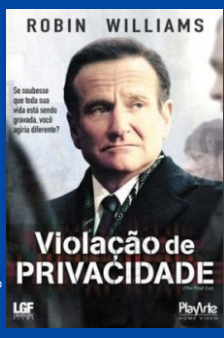

Discussion on security measures and actions for the FIFA World Cup in Brazil were the main topics during the XXIV Brazilian Private Security Congress, organized by the ABSEG - Brazilian Association of Security Professionals, in Sao Paulo city, between May 8 and 10. The Nucleo security expert, Igor Pipolo, attended the congress and conducted the speech "Security in Main Events", a high-risk operation, highly visible and directly linked to the institutional image of the event sponsor and organizers. "The bases for protection processes in an event are prevention and reaction. This is the way to minimize the overall risks", said Pipolo during the lecture, which illustrated the theme with real cases of his experience in the area. *Photo: Pipolo receives from the hands of Cristiane Santana, director of ABSEG, a plaque of appreciation for his participation.*

Anixter University

Joao Jaouiche, associated consultant at Nucleo, attended between May 15 and 16 the Anixter University training program, which was focused on providing technological expertise for current and future technologies. The training entitled "Data Center College - Overview" presented a comprehensive range of technical information and complete solutions to meet the needs of customers who want to design a reliable data center. "This activity, besides providing technical expertise, has made possible a significant exchange of experiences, discussed and debated by the participants, which presented problems and solutions related to data centers projects and installations", said Jaouiche.

Movie Suggestion

Name: "The Final Cut"
Country: USA

Direction: Omar Naim
Year: 2004
Science Fiction/105 min.

Commented Synopsis: The story takes place in a world where microchips are implanted in memory to record every moment of life of an individual. The chips are removed after death so that images can be edited into a kind of "best times" for the loved ones who want a memento of the deceased. Robin Williams is the editor who has the power of final edit over people's recorded stories. His latest work puts him in danger. Jim Caviezel is the leader of the organization that opposes the development of this technology. "A futuristic story in which technology comes into conflict with ethical values. The story raises many delicate questions such as: Where is the privacy of the person who died? Is it fair that a person sees all your moments? Is it right to disregard important facts to highlight only those that are convenient for people who watch? A film to think!". *Marcela Floriano*
